Salumatics to showcase latest document viewer technology at upcoming Arab Health exhibition in Dubai, UAE

Mississauga, ON (January 12, 2012) – Salumatics Inc. is pleased to announce that it will be exhibiting at the upcoming Arab Health conference in Dubai, United Arab Emirates from January 23rd to 26th at the Dubai International Convention & Exhibition Centre. Over 65,000 healthcare attendees are expected, representing 60 countries. Salumatics will showcase the latest version of SaluVision[®], their document viewer software solution.

Salumatics' flagship product SaluVision[®] provides seamless access to images of client records. SaluVision is a web-based Software-as-a-Service (SaaS) electronic document management solution (EDMS) that allows users to search, sort, view and print electronic documents that have been scanned from paper, uploaded electronically, or imported from third party health information systems through standardized (HL7) or non-standardized interfaces. By removing the barriers to data access, SaluVision provides stakeholders with instant and secure access to critical information, anywhere, anytime.

According to Allan Magnacca, President and CEO of Salumatics, "We're very excited about participating in this prestigious conference and exhibition. This will enable us to validate and verify the Middle East market for our services and solutions, while giving us the opportunity to showcase our SaluVision technology to healthcare executives from around the world."

Visit Salumatics in booth # SAD56 within the Canadian Pavilion at Arab Health 2012.

About Salumatics Inc.

Salumatics is an information management company offering an integrated portfolio of services, solutions and technologies to healthcare providers, business and government. Salumatics services include records scanning & document conversion, ICD-10 coding & abstracting, data hosting & business continuity, and long term records management.
